Project Design Phase-II
Technology Stack (Architecture & Stack)

Date	19/10/2022
Team ID	PNT2022TMID41146
Project Name	Statistical Machine Learning Approaches To Liver Disease Prediction
Maximum Marks	4 Marks

Technical Architecture:

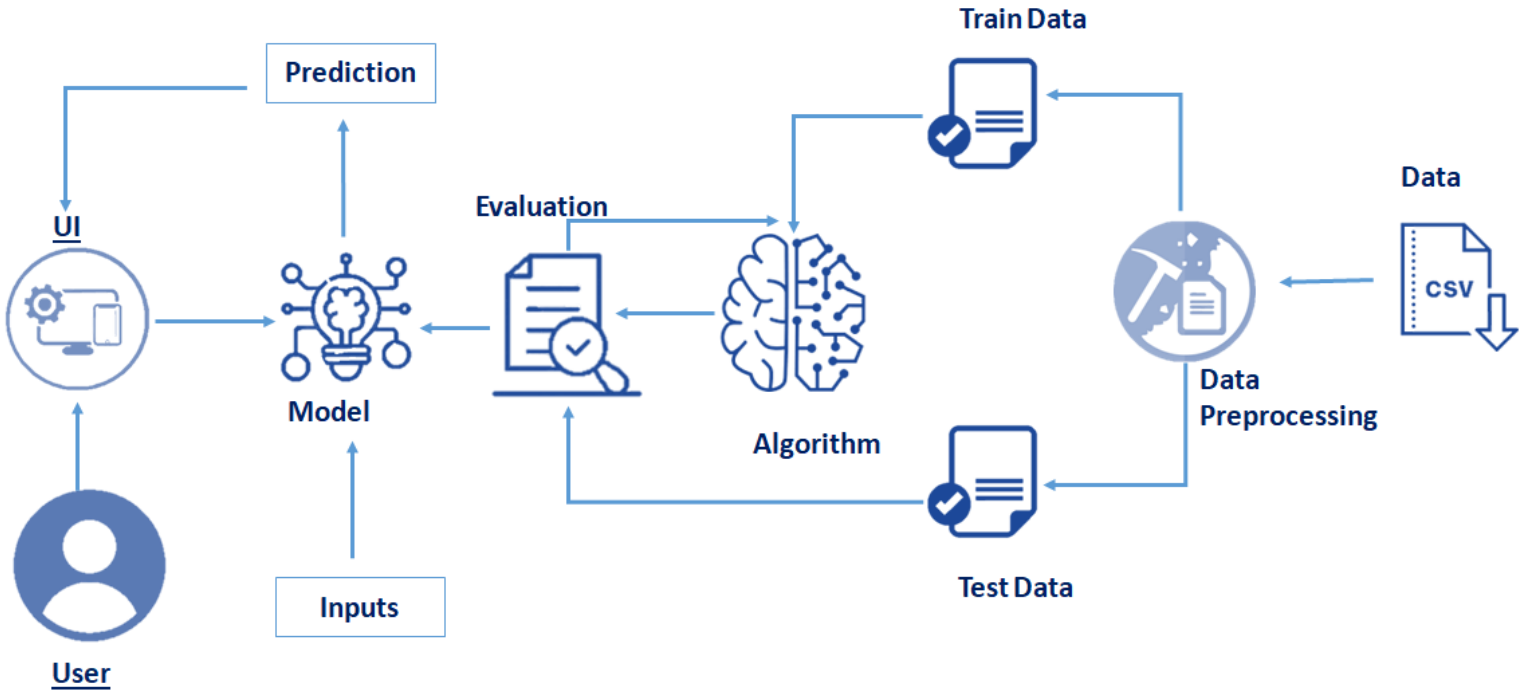

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	User Interface	How user interacts with application e.g. Web UI, Mobile App, Chatbot etc.	HTML, CSS, JavaScript
2.	Application Logic-1	Creating an application interface.	Python
3.	Application Logic-2	Logic for a process in the application	IBM Watson STT service
4.	File Storage	Files are stored in the local storage and stored in the cloud.	IBM Block Storage or Other Storage Service or Local File
5.	External API-1	Use this REST API to manage locations. Get all locations. URI, /admin/resources/locations. Method, GET	IBM Location REST API
6.	Deep Learning Model	Creating an algorithm to calculate case information provides by the hospitals.	Object Recognition Model, etc.
7.	Infrastructure (Server / Cloud)	IBM Cloud App Configuration is a centralized feature-management and configuration service on IBM Cloud	IBM Cloud Foundry & Kubernetes

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	There are no open-source frameworks in this application.	Python
2.	Security Implementations	Block chain technology is used for Security implementation its private framework protects all data..	Block Chain
3.	Scalable Architecture	Users are provided with medical services online and giving awareness to people by giving therapeutic medicines and monitoring user movements in pandemic zones and alerts before they are affected	IBM Cloud
4.	Availability	Medicinal Recommendations, Test kits, Doctor suggestions, and Updated Contaminated zones are available in application	IBM Watson Assistance
5.	Performance	The geo-fencing algorithm is updated daily and shows the day-to-day updates of the contaminated zones	Geofence
